**Water and Sewer Rate Adjustments**

1. In order to obtain an adjustment to the water and sewer charges incurred in the event of an aboveground water leak on the property owner’s side of the meter, the following conditions must be met:
  - a. The Utility Superintendent, Town Manager or their designee must review and inspect the leak before any repair is made, or sufficient evidence must be provided to the Utility Superintendent, Town Manager or their designee to document the cause and nature of the leak.
  - b. The Utility Superintendent, Town Manager or their designee must determine that the leak resulted from a major failure of the water system such as a broken pipe or valve as opposed to a condition or situation that the property owner was or should have been aware of such as a tap or hose left running, running toilet, leaking taps, leaking swamp cooler, known and unrepaired leaks, irrigation usage, etc.
  - c. The Utility Superintendent, Town Manager or their designee must see evidence of the repair of the leak.
  - d. The amount of water used on the utility bill (water used and water lost due to the leak) must be equal to or greater than twice the historical usage on the property for the same month in the previous year. If the property has had utility service for less than one year, the Town Manager and Town Treasurer shall estimate the usage based on the nearest month in the same season.
  - e. No adjustments shall be made for water used for irrigation purposes.

If the above conditions are met, the Utility Superintendent or Town Manager will instruct the Town Treasurer to make an adjustment to the utility account. The water and sewer rate will be adjusted according to paragraph 3 below. Rate adjustments will be applied only if the property owner is diligent in fixing the leak within three days of its detection. If diligence is not shown within three days, a Waste of Water penalty of \$50 per day will be assessed each following day until the Superintendent is satisfied the repair is completed, and additional penalties as outlined in Section 8.1.16.B may apply. Repair costs are the responsibility of the property owner.

2. In order to obtain an adjustment to the water and sewer charges incurred in the event of an underground water leak on the property owner's side of the meter, the following conditions must be met:
  - a. The Utility Superintendent, Town Manager or their designee must review and inspect the leak before any repair is made, or sufficient evidence must be provided to the Utility Superintendent, Town Manager or their designee to document the cause and nature of the leak.
  - b. The Utility Superintendent, Town Manager or their designee must determine that the leak resulted from a failure of the water system as opposed to a deliberate waste of water, a condition or situation that the property owner was or should have been aware of, or an aboveground leak as described in paragraph 1 above.
  - c. The Utility Superintendent, Town Manager or their designee must see evidence of the repair of the leak.

If the above conditions are met, the Utility Superintendent or Town Manager will instruct the Town Treasurer to make an adjustment to the utility account. The water and sewer rate will be adjusted according to paragraph 3 below. Rate adjustments will be applied only if the property owner is diligent in fixing the leak within five days of its detection. If diligence is not shown within five days, a Waste of Water penalty of \$50 per day will be assessed each following day until the Utility Superintendent is satisfied the repair is completed, and additional penalties as outlined in Section 8.1.16.B may apply. Repair costs are the responsibility of the property owner.

3. Adjustments shall be based on the amount of the meter readings for the same month a year prior. The water user will pay the current rate for the amount of water and sewer as the prior year's reading plus  $\frac{1}{2}$  of the current lowest usage rate for all additional water resulting from the leak. If the property has had utility service for less than one year, the Town Manager and Town Treasurer shall estimate the usage based on the nearest month in the same season.
4. In order to obtain an adjustment to the sewer charges incurred on the filling of a swimming pool, 1) the owner must provide sufficient proof to the Utility Superintendent that the pool doesn't drain to the sewer, and 2) the owner must contact the Utility Superintendent before filling the pool and when the pool is full, so the water used to fill the pool can be metered. The Utility Superintendent will provide the meter readings to the Town Treasurer. Only the amount of water used for filling the pool will be adjusted from the sewer fees; there will be no adjustment to the water charges. If this procedure is not followed, or if the pool is found to drain into the sewer system, there will be no adjustment to the sewer charges.
