

**DRINKING WATER SOURCE PROTECTION
PUBLIC NOTIFICATION STATEMENT**

The *Drinking Water Source Protection Plans for the Town of Springdale Water System* are available for your review. The plan contains information about source protection zones, potential contamination sources, and management strategies to protect our drinking water. Identified potential contamination sources common in our protection areas are underground storage tank facilities, agricultural areas, forested areas, commercial areas, residential areas, roads, mining activities, coal deposit areas, and parks. Additionally, our surface water source, North Fork of the Virgin River, has a high susceptibility to contamination. We have also developed management strategies to further protect our sources from contamination. Please contact us at (435) 772-3434, if you have questions or concerns about our source protection plans.
